

Pressure Vessels and Specialty Fabrications.

CrMo Coker Nozzles

KLAD provides

- Turnkey services to design and fabricate ASME Section VIII, Division 1 Pressure Vessels, Drums, Towers, Absorber Columns and Hydro-Treater Reactors, for the Refining, Oil and Gas, Chemical Process and other Industries.
- Fabrication from Clad Plate and/or Strip/Wire Overlay, and Solid Stainless, Nickel & other high Alloys.
 - Base Materials - Carbon, 1 1/4 Cr, 2 1/4 Cr-1Mo steels, with or without controlled chemistry, in addition to Solid Stainless and Nickel Alloy Fabrication.
 - Cladding & Alloy Overlays for Stainless Steels, Alloy 825, Alloy 625, Alloy C276 and others, with testing to meet dis-bonding & other Project Specifications.
 - Expedited Fabrication of new Vessels as well as Upgrade Modifications of existing Vessels to meet critical turnaround schedules.
 - Specialty Fabrications include Heat Exchanger Shells, Channel Covers, Transfer Line Headers & Piping, and overlaid Tube Sheets.
